Response to Applicants' Amendment and Arguments

1. The amendment filed July 19, 2004, has been entered and made of record.

In response to the amendment, the objection to claim 38 due to informalities, and the rejections of claim 34 under 35 U.S.C. § 102 are withdrawn.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Claim 13 requires detecting character regions whose matching degrees are high by making comparisons between positions and sizes of the regions. As is apparent from various Office Actions, while the prior art of record teaches making comparisons between positions of the character regions, it does not teach making a comparison between sizes of the regions. Claims 2 and 36 have a similar recitation. Claims 3, 14, 17, 29 and 37 have a similar recitation, detecting overlapping based in part the comparison between positions and sizes of the character regions. Claims 4-11 depend from claim 2, and claims 30-31 depend from claim 29.

Claim 15 requires comparing between the number of line image containing only character images in the plurality of regions vertically partitioned and the number of such line image found in the plurality of regions horizontally partitioned, and judging the plurality of regions that hold more line image found to contain only character images as a low graphic-ratio region. The prior art of record does not teach or suggest this limitation. Claims 16, 32, 33, 34, 35, 38, 39 and 40 recite analogous limitations. Claims 18-28 depend from claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
